About Visiplex

Visiplex is a leading manufacturer of wireless PA speakers, two-way intercom stations, LED message boards, analog & digital clocks, LED beacon lights and more. Visiplex wireless solutions are tailored to specific industries & markets, such as: commercial facilities, industrial plants, K-12 schools & campuses, federal buildings, camp grounds, medical centers, assisted living facilities, public venues, military bases and many others.

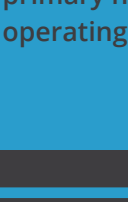

Our systems are AFFORDABLE

Visiplex wireless systems are more cost effective when compared to hard wired systems. Our systems can be self installed and only require an outlet for AC power or access to an ethernet port for POE.

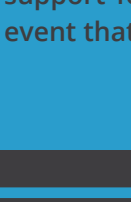

Our systems are EXPANDABLE

Because Visiplex Systems are plug and play, they can easily be expanded or relocated as needed. Adding a new product can be as simple as connecting it to an outlet and registering it to your system.

Our systems are RELIABLE

Our systems use a dedicated Radio Frequency which does not rely on other networks such as WIFI or VoIP to operate. This means when your primary network is down, you will still have an operating communication system.

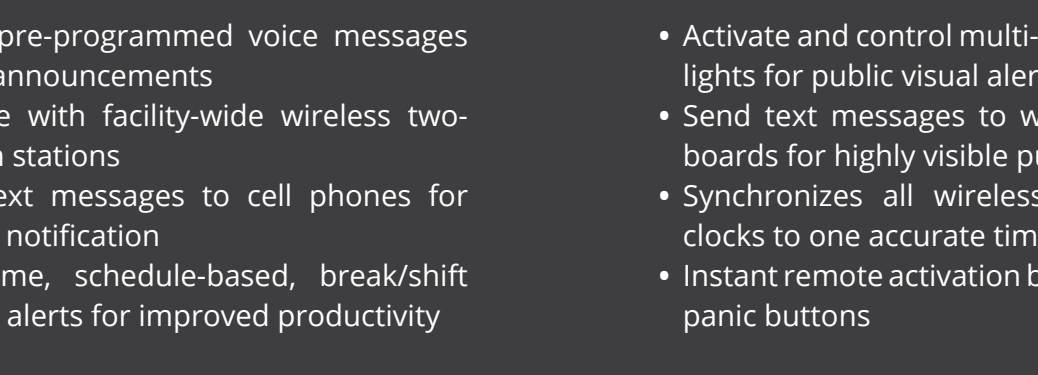

Our systems are HIGH-QUALITY

Visiplex designs and makes all of our systems in the US, offering the highest quality products to our customers. We also offer free technical support for the lifetime of the system in the event that additional support is ever needed.

WIRELESS BASE STATION

VS4820

- Playback of pre-programmed voice messages or live-voice announcements
- Communicate with facility-wide wireless two-way intercom stations
- Send SMS text messages to cell phones for instant event notification
- Initiate on-time, schedule-based, break/shift bell and tone alerts for improved productivity

- Activate and control multi-color wireless beacon lights for public visual alerts
- Send text messages to wireless LED message boards for highly visible public notifications
- Synchronizes all wireless analog and digital clocks to one accurate time
- Instant remote activation by SMS text or wireless panic buttons

TRANSMITTER & ANTENNA

VS101-HP

HIGH POWER TRANSMITTER

- Works with the VS4820 base station to provide extended wireless coverage range for medium to large facilities
- Comes standard with one rubber duck antenna and one magnetic mount antenna

VS654

OUTDOOR ANTENNA

- Works with the VS101-HP transmitter to provide extended wireless coverage range for multi-building campuses
- Comes with a mounting kit, grounding kit and lightning arrestor

WIRELESS PA SPEAKERS

VNS2640

PA SPEAKER WITH MESSAGE BOARD & LIGHTS

- Wirelessly delivers bell tones, pre-programmed alert messages and live-voice PA announcements
- Alphanumeric LED message board that can display text messages in addition to digital time and date
- Four multi-color LED beacon lights
- Includes all VNS2620 features

VNS2620

PA SPEAKER WITH LIGHTS

- Wirelessly delivers bell tones, pre-programmed alert messages and live-voice PA announcements
- Four multi-color LED beacon lights
- Add-on two-way radio receiver for integration with an existing two-way radio system
- Add-on FM receiver for custom music from a user-controlled source

TWO-WAY INTERCOM STATION

VNS2420

- Functions as a PA speaker for bell tones, pre-programmed alert messages and live-voice PA announcements
- Two-way communication with the system operator at the VS4820 base station
- Two-way communication with other nearby VNS2420 intercom stations
- LCD display and scrolling options to program a variety of customizable settings
- Add-on handset available for privacy

WIRELESS RECEIVER

VNS2210

- Wirelessly receives bell tones, pre-programmed alert messages and live-voice PA announcements, feeding the audio through up to two connected speaker(s)
- Add-on NEMA box enclosure for outdoor applications
- Add-on battery backup for full functionality during power loss

PA SPEAKERS

VNS2087

HORN SPEAKER

- Weatherproof horn speaker
- Up to two horn speakers can be controlled by each VNS2210 wireless receiver

VNS2081

CEILING SPEAKER

- Built-in wall/ceiling speaker
- Up to two ceiling speakers can be controlled by each VNS2210 wireless receiver

MESSAGE BOARDS

VNS1610

VNS1620

VNS1630

- Receives alphanumeric text messages from the VS4820 base station
- Can be used as a digital clock by default to display the date and time
- One or two-line configuration with multiple fonts and display formats

- Add-on integrated PA speaker for bell tones, pre-programmed alert messages and live-voice PA announcements
- Add-on integrated battery backup
- Default red color with add-on options of blue or green

WIRELESS VISUAL ALERTS

VNS2720

WIRELESS BEACON LIGHT

- Multi-color lights allow for different color activations based on specific types of emergencies
- Ability to control color, brightness, flash type and duration
- Weatherproof housing with powerful, long-lasting LEDs

VNS2710

WIRELESS CORRIDOR LIGHT

- Multi-color lights allow for different color activations based on specific types of emergencies
- Ability to control color, brightness, flash type and duration
- Ability to activate an individual light segment or all four light segments at once

MOBILE ALERT BUTTONS
